Greetings Russell,

You have our blessings to make it a sampling rig, or excess the beast. We will keep the logging trailer for the geophysical tools.

Thanks,

Randall (and Steve)

Subject: Hydro Truck from Las Vegas

I believe the original plan for the Hydro truck that we got from the Vegas ERT folks was to make it into a well logging/sampling truck. It is my understanding that it is no longer wanted for this purpose, is that correct Randall and Steve? There was also some interest in using it for a sampling truck for HF and Pavillion samples, is there still any interest in this? If no one has any intentions for using this truck then I will begin the process to excess it. Please let me know what you have in mind.

Thanks,
Russell
